Project Title	SmartLender-Applicant Credibility Prediction for Loan Approval
Maximum Marks	5 Marks

Project Proposal (Proposed Solution) report

This proposal presents the Smart Lender system, an AI-based solution designed to simplify the loan selection process. It helps customers find suitable loan options based on their eligibility, making the loan application process faster, easier, and more accurate.

Project Overview	
Objective	To develop an AI-based smart lender system that recommends the most suitable loan based on customer eligibility, income, and credit score, enabling faster and more accurate loan decision.
Scope	The project helps customers compare loan options, check eligibility, receive personalized loan recommendations, and apply for loans through a simple online platform.
Problem Statement	
Description	Customers often struggle to choose the right loan because of different eligibility criteria, interest rates, and lengthy application procedures. This leads to confusion and delays in loan approval.
Impact	The smart lender system simplifies loan selection, reduces processing time, improves customer experience, and increases the chances of selecting the most suitable loan.
Proposed Solution	
Approach	Use AI to analyze customer information, evaluate eligibility, compare loan options and recommend the best loan with a simple application process.
Key Features	• AI-based loan recommendation • Eligibility checking • Loan comparison • Online loan application • Real-time application status tracking

ResourceRequirements

ResourceType	Description	Specification/Allocation
Hardware		
Computing Resources	Processor required for development and testing	Intel core i5/i7 or equivalent
Memory	RAM specifications	8 GB
Storage	Space for project files and database	256 GB SSD or above
Software		
Frameworks	Web development frameworks	Salesforce Agentforce/Apex, Lightning web components(LWC)
Libraries	Required libraries and APIs	Sales force APIs, REST APIs, javascript
Development Environment	IDE/platform	Salesforce developer org, VS code
Data		
Data	Customer and loan details	Customer profile, income, credit score, losn eligibility data
