

Date	15 March 2024
TeamID	xxxxxx
ProjectName	SmartLender-ApplicantCredibility Prediction for Loan Approval
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	TeamMember	Idea / Suggestion	Category	Group No.
1	Ratnakumari Balla	Develop a smart lender system to predict loan approval using machine learning	Machine Learning	
2	Kutikuppala sairamana sushma	Create a user-friendly web application using flask for loan prediction	Web application	
3	Ratnakumari Balla	Compare ML algorithms(Decision Tree,Random Forest,KNN,XGBoost)to select the best model	Model selection	
4	Kutikuppala sairamana sushma	Use applicant details such as income,credit history,education,loan amount,etc.,for prediction	Data analysis	
5	Ratnakumari Balla	Generate fast and accurate loan approval predictions	Prediction system	
6	Kutikuppala sairamana sushma	Reduce manual verification and improve banking decision-making	Banking automation	

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	Smart lender machine learning based loan approval prediction system	High	High	1	yes
