

Project Initialization and Planning Phase

Date	15 March 2024
Team ID	xxxxxx
Project Name	SmartLender-ApplicantCredibility Predictionfor Loan Approval
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Many people struggle to find the right loan due to different bank policies and eligibility criteria. Comparing multiple loan options is time-consuming and confusing. Customers often do not know which loan best suits their financial profile. This can lead to delays, rejections, or choosing unsuitable loan plans. The Smart Lender system uses AI to analyze customer information and recommend the best loan options. It makes the loan selection process faster, simpler, and more accurate for customers

Example:

I am	I'm trying to	But	Because	Which makes me feel	
Applicant seeking a loan	Secure a loan for property	Married with no co-applicant income	Self-employed with a good credit history	Optimistic about loan approval	
Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A college student	Find affordable and nutritious meals on campus	Current canteen options are limited and often crowded	Information about menus, prices, and crowd levels is not easily available	Frustrated and wasting valuable time
