Maximum Marks	4 Marks

Empathy Map

An empathy map is a customer-centered tool used to understand the needs, thoughts, actions, and emotions of a loan applicant. For the **Smart Lender** project, it helps identify the challenges customers face while searching for suitable loans, understanding eligibility, and comparing loan options. By analyzing what customers **say, think, do, and feel**, the Smart Lender system can provide personalized loan recommendations, simplify the application process, and improve the overall customer experience.

SAYS - I need a loan quickly - Which loan is best for me? - I want a simple application process.	THINKS - Will my loan be approved - Can I afford the monthly EMI? - Which bank offers the lowest interest rate?
Ravi kumar (loan Applicant)	
DOES - Compares loan options online. - Checks eligibility criteria. - Uploads documents and applies for a loan.	FEELS - Confused by many loan choices. - Worried about loan approval. - Happy when receiving suitable loan recommendations quickly.
